PROJECTS

MAKEUP SCHOOLING

| [Github-server](#) | [Github-client](#) | |[Live site](#)

A website for summer-camping where user,teacher,admin can play their role.

- User can normally buy makeup class,payment add carts are also available .He also can Rate our page.He can See his payment History.After successfully add the payment user class will be seen in the enrolled class.
 - Instructor can add classes and Can Update the class he added .Private route implemented added jwt token in server.
 - Admin route who have the overall power to see all the info. Can Add/deny the class add by instructor. Can make admin.
- Technology & Language : React,Tailwind,Daisyui,Node js,Express js,mongoDB ,Firebase authentication, Stripe,React-icons, etc.

TOYS WORLD

| [Github-server](#) | [GithubB-client](#) |[live site](#)

A website for Selling disney toys where user can add their product for sell.

- Different functionality available like a user can add a toy ,Delete toy and also he can update the toy as he want to do.
- there is also a section where only user will see his/her added info where I implement private route so it is much more secure to use.Only User can see his information not other user's information.
- used mongodb to store data also added firebase authentication So that User are able to log in with google or email.

Technology & Language : React.js,Bootstrap,Node js,Express js,MongoDB,Firebase Authentication,sweetalerts,React-icons etc.

HOSPITAL SERVICE

| [Github](#) |[live-site](#)

A website for Hospital service user can see different service from different department of the hospital.

- User can see Different Department according to their needs.There is also view details to see the whole information about the Doctor.
- He/she can book a appointment for him/her to visit the hospital so that he can get the service he wanted for .

Technology & Language : Next.js,Tailwind,Imgbb,React-icons etc,
