Projects

AgriNext – Smart Farming E-commerce Platform | Live Site | Client | Server

- Built a multi-language (English & Bangla) platform for farmers with secure authentication, role-based access (user, seller, admin), and private routes.
- Implemented product CRUD, blogs, chatbot, weather insights, and personalized notes using React.js, Node.js, Express, MongoDB, and Firebase.
- Integrated seller request approval system and payment gateway for buying/selling experience.

Makeup Schooling – Summer Camp Platform | Live Site | Client | Server

- Designed a class booking platform with role-based access for users, instructors, and admins.
- Integrated payment system (Stripe), class management, and rating features.
- Implemented JWT-based authentication for secure access.

Hospital Service – Healthcare Booking Platform | Live Site | Repo

- Developed a hospital service site where users can view departments, doctor details, and book appointments.
- Built with Next.js, Tailwind CSS, and integrated image hosting with ImgBB.

Education

B.Sc. in Computer Science & Engineering – Dhaka City College (Expected 2025)
